## Final Project description

My final Project, I gonna show “how to be an realistic artist” and my portfolio (all my artwork, my own project). it’s about realism-photorealism and style in drawing. I will be creating my first Porfolio website to present myself and how to be an Artist of Realism-art. My website definitely included my art project and the video every step with sticky Nav tab, transition and everything I learned on Class.

The first thing on my Website definitely jumps to all anybody attention, with big Slide and hi-quality Photos that dominates the part of the page. The Font used on my page is called Jullsville, my favorite mix nude oriented color scheme & minimal design.
